ed in print, but I know it is a sure cure.

Two Polish physicians have been making experiments for the purpose of ascertaining the effect upon the liver of alkaline mineral waters. Their results indicate that alkaline waters increase the quantity of bile when taken freely. These experiments also included observations upon the effects of hot water upon the liver, the combusion being that hot water prosesses the same properties as alkaline waters. We have proved in a lerge number of cases that the use of hot water is one of the most effective means of encouraging a torpid liver. When the liver is torpid, there is usually a red sediment in the brine. From six to eight glasses of hot water should be taken daily until the sediment disappears. Ex.

Two Polish physicians have been making experiments for the purpose of alrahine mineral waters. Their results indicate that alkaline waters increase the quantity of bile when taken freely. These experiments also included observations upon the effects of hot water upon the liver, the conclusion being that hot water possesses the beame properties as alkaline waters. We have proved in a large number of cases that the use of hot water is one of the most effective means of encourseing a torpid liver. When the liver is torpid, there is usually a red sectiment in the urine. From six of eight glasses of hot water should be baken fally until the sediment disappears—E.

The following from the Southern Live effoct, journal, and all without doubt have their good points. But has not his because properties a better and a hardier race? Certainly a hardier. It it believed that he had a blood of Saxon, cell, frank. German, and Sweder, on any of our readers. Any man who depends upon a regular and systematic feeding. There is a skill or a peculiar thank it is the business that can only be acquired by Jong practice and close observation. At the north, where farmers by steers to fatten through the winter, the feeding is seldom left to the liver hand. The farmer feels that if hey is takes but lithle to throw his digestive machines con in seal marry a pound ner dive or a pound and an half alway it takes but lithle to throw his digestive machines con a pound and an half alway it takes but lithle to throw his digestive machines on a productive of a pound not always a pound ner diverse requirely. The most how scores the seal growers try to give a preat variety of food. They fry to make the rations for a local animal a serie of a large from the seal of the product of the seal of large from the seal of the product of the seal of large from the seal of the product of the seal of large from the seal of the product of the seal of large from the seal of the seal of the product of the seal of the seal

One of the best remedies for rough or chafed hands is the following: One ounce of glycerine, one ounce of rose water, six drops of carbolic acid. In cold weather, whenever it is necessary to wash the hands, apply a few drops while they are moist, and rub well into the skin. It may also be used for the face.

MOTES AND HINTS FOR ALL

Dressing for Harness.

Are you aware of the fact that grooming save feed? If you have any doubts oncorning it just try the experiment for yourself.

A self egg will sink in water. A boile egg which is done, willdry quick you the shell when taken from the retire. The boiled eggs which athere to the held ire fresh laid.

A recipe to make a potato pudding fir lace with a wooden spoon, through a polar of once of sugar and flavoring.

One remedy for catarrh is to use a mail doubthe with the following solution, sight and morning. Tincture tannin, one gaster dince; borax (pulverized), one emer carbolic soda, one quarter ounce, east water, one half pint. Keep bowels spen.

A cheap and very effective way to raise the temperature in a cellar that is dangerously near the freefing point is of solution, and the explication of an ice beg over the seat of the lesion, is just now one of the leading topics in the medical circles of New York.

The recipe for the government harness dreasing is as follows: One gallon meastfoot oil, two pounds bay-berry most for the seat of the lesions; in the medical circles of New York.

The recipe for the government harness dreasing is as follows: One gallon meastfoot oil, two pounds bay-berry most for the seat of the lesions; in the medical circles of New York.

The recipe for the government harness dreasing is as follows: One gallon meastfoot oil, two pounds bay-berry most for the seat of the lesions; in the medical circles of New York.

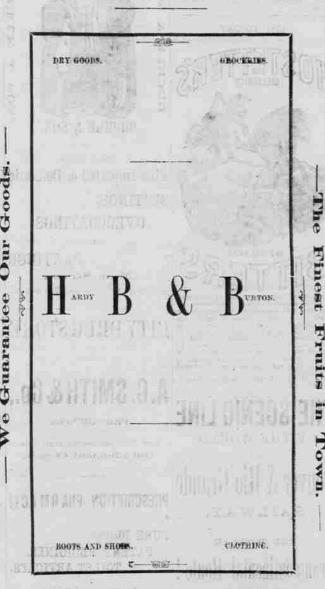

The recipe for the government harness dreasing is as follows: One gallon meastfoot oil, two pounds bay-berry most for the seat of the lesion, is just now one of the lesion of the gallon with the following of six grains of long the producing a large gound in water a milk, but some breeds are almost eduality as for ich ness, The cows are small to medium in size, with light heads and necks and the way for milk of average quality as to rich ness. The cows are small to mediu

other breed has had anything like the folded of potassium every two hours, and the application of an ice bag over the seat of the leafon, is just now one of the leading topics in the medical circles of New York.

The recipe for the government harpess dressing is as follows: One gallon neatafoot oil, two pounds bay-berry tallow, two pounds of bees-wax. Put the above in a pan over a moderate fire, when horoughly dissolved add two quarts of castor oil, then while on the fire stir in one onnce of lampblack. Mir well and strain through a fine cloth to remove sediment, let cool, and you have as fine a dressing for harness or leather of any kind as can be had.—Ex. Here are two excellent ways of preparing a very digestible and economical meal of apples with rice. Boil rice very soft and line with it a well buttered pinding dish. Lay over it a layer of slice apples, using an easily cooked variety, alternate layers of rice and apples until the dish is full. Add a little water to keep the rice from becoming dry on ton, and bake until the apples are done. Another way is to pare some apples and memore the cores, and fill and cover them with boiled rice, allowing a curpalled uncooked rice for each half does apples, cook is a steamer. Eat with ream and sugar.

Says a correspondent of the Prostric Former Somefiticen years ago my fowling of the proper in each of the nests, in a few days with proper for posts, but as they were not at hand. I made assasfras of my lot ones, by smearing them lightly with oil of assasfras; also put a few drops in each of the nests, in a few days with proper the proper temperature, we need that the proper temperature, we need that proper to the proper to th
